#### 9. FUNCTIONAL SPECIFICATION

#### 9.1 Commands

Refer to the Technical Manual for the SH1106

#### 9.2 Power down and Power up Sequence

To protect OEL panel and extend the panel life time, the driver IC power up/down routine should include a delay period between high voltage and low voltage power sources during turn on/off. It gives the OEL panel enough time to complete the action of charge and discharge before/after the operation.

#### 9.2.1 Power up Sequence:

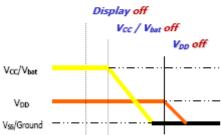

- Power up V<sub>DD</sub>
- 2. Send Display off command
- 3. Initialization
- 4. Clear Screen
- 5. Power up V<sub>CC</sub>/ V<sub>BAT</sub>
- Delay 100ms (When V<sub>CC</sub> is stable)
- 7. Send Display on command

- 1. Send Display off command
- Power down V<sub>CC</sub> / V<sub>BAT</sub>
- Delay 100ms (When V<sub>CC</sub> / V<sub>BAT</sub> is reach 0 and panel is completely discharges)
- 4. Power down VDD

VDD / VBAT OR

#### Note 13:

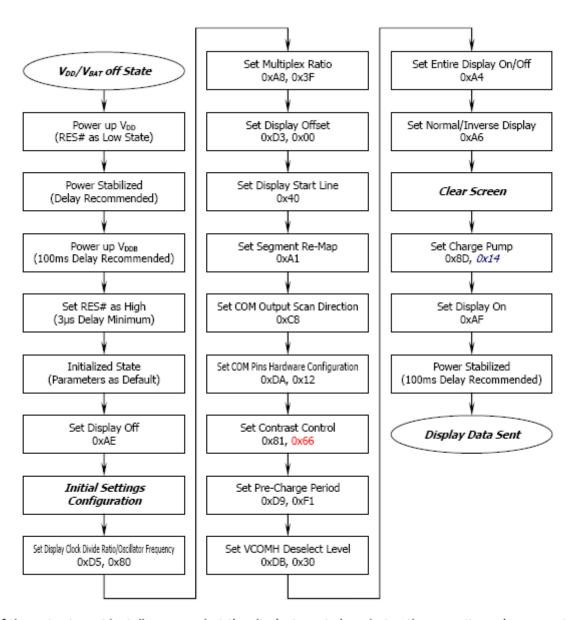

- Since an ESD protection circuit is connected between V<sub>DD</sub> and V<sub>CC</sub> inside the driver IC, V<sub>CC</sub> becomes lower than V<sub>DD</sub> whenever V<sub>DD</sub> is ON and V<sub>CC</sub> is OFF.
- V<sub>CC</sub> / V<sub>BAT</sub> should be kept float (disable) when it is OFF.
- Power Pins (VDD, VCC, VBAT) can never be pulled to ground under any circumstance.
- 4) VDD should not be power down before VCC / VBAT power down.

#### 9.3 Reset Circuit

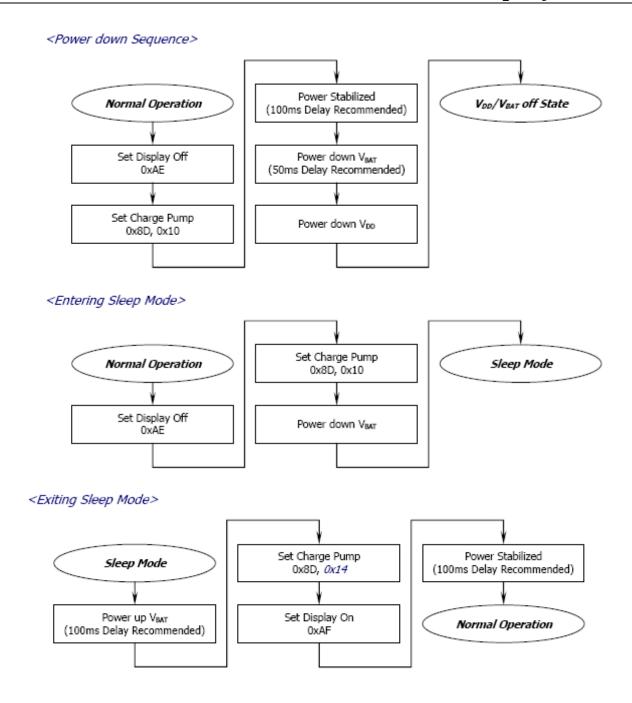

When RES# input is low, the chip is initialized with the following status:

- 1. Display is OFF
- 2. 128×64 Display Mode
- Normal segment and display data column and row address mapping (SEG0 mapped to column address 00h and COM0 mapped to row address 00h)
- 4. Shift register data clear in serial interface
- 5. Display start line is set at display RAM address 0
- 6. Column address counter is set at 0
- 7. Normal scan direction of the COM outputs
- 8. Contrast control register is set at 7Fh
- 9. Normal display mode (Equivalent to A4h command)

#### 9.4 Actual Application Example

If the noise is accidentally occurred at the displaying window during the operation, please reset the display in order to recover the display function.
